Model MCT80B General Wall-mounted Temperature Transmitter

MCT80B General Wall-mounted Temperature Transmitter is a temperature transmitter which can be easily installed on the wall. It coverts the temperature value of air to standard electrical signals (e.g. 4-20ma, 0-5V etc.) for automatic control or remote data acquisition system. The products have already extensively applied in the field such as smart building telecommunication, electric power, textile industry, food processing etc.

FEATURES

- Advanced non-linear adjustment circuit
- Floating self-adjustment circuit
- Sole anti-interruption circuit
- High accuracy cold end compensation circuit
- Anti-corrosive, high reliability

SPECIFICATIONS:

Range	-50℃～+80℃
Sensor	± 1%
Power Supply	24VC±10%
Output	4-20mA、0-5V、0-10V etc.
Humidity	≤ 95% RH

Response time   ≤10ms

ORDERING CODES

MCT80B-（℃)-□ General Wall-mounted Temperature Transmitter			
		Range	
（℃）		User specifies	
			Signal output
		1	4-20mA
		2	0-5V
		3	0-10V
		4	User Specified
